### Letter of Recommendation for Md Saidul Islam

I am happy to write a letter of recommendation for Md Saidul Islam. I know him from various lectures, seminars, and many stimulating discussions during his master thesis and a lab job in my group. Mr. Islam is fully devoted to science and engineering. I particularly point out his modeling skills and his ability to familiarize himself with new subjects quickly.

Mr. Islam has convincing communication skills and knows how to give nice presentations. While he has proven to be able to work independently, he also has a good ability to work in a team. Finally, yet importantly, Mr. Islam is a nice person. I always enjoyed interacting with him.

In conclusion, I recommended Md Saidul Islam for a PhD thesis in the field of simulation and modeling without reservation.

Kiel, March 27, 2024,

Prof. Franz Faupel
